FROM the first bubble of gasoline in the morning to the last drop at night, the economy of the Buick Valve-in-Head motor delivers a daily mileage of surprising value.

There is no question about it—the Valve-in-Head principle as designed in Buick construction is built to give an unusual mileage with assurance of continuance from the beginning to the ending of years of use.

And with economy molded together with Power—Quality and Value—makes the Buick Valve-in-Head a dependable car—as well as reliable.

Ask your local dealer to show you these advantages and you will become more thoroughly convinced that it is the car for which you have been seeking.
